

ID	Name	Department	Region	Sales	Experience	Rating	Join Date						
	101	Ali Khan	Sales	North	45000	3	Good	2023-01-15					
	102	Sara Ahmed	IT	South	62000	5	Excellent	2021-06-10					
	103	Bilal Malik	Sales	East	31000	1	Average	2025-02-20					
	104	Hina Tariq	HR	North	28000	4	Good	2022-11-05					
	105	Usman Ghani	IT	West	75000	6	Excellent	2020-08-12					
	106	Ayesha Noor	Sales	South	53000	2	Good	2024-04-01					
EXCEL PRACTICAL TEST QUESTIONS													
Section 1: Basic Math & Statistical Functions													
	1	Write a formula to find the total (sum) of all employees' sales.											
	2	Write a formula to calculate the average experience of all employees.											
	3	Write a formula to find the highest sales amount achieved in the company.											
	4	Write a formula to find the lowest sales amount achieved.											
	5	Write a formula to count the total number of employees listed in the table using the ID column.											
Section 2: Conditional Formulas (COUNTIF)													
	6	Write a formula to count how many employees work in the "Sales" department.											
	7	Write a formula to calculate the total sales made by employees in the "North" region.											
	8	Write a formula to count how many employees have a "Good" performance rating.											
	9	Write a formula to find the total sales generated by employees who have more than 3 years of experience (>3).											
	10	Write a formula to count how many employees work in the "IT" department and have an "Excellent" rating.											
Section 3: Logical Functions (IF)													
	11	Write an IF formula: If true, return "Target Met"; if false, return "Needs Improvement".											
	12	Write a nested IF formula: If sales > 50000, return "Tier 1"; if sales > 30000, return "Tier 2"; otherwise, return "Tier 3".											
Section 4: Date & Time Functions (ISBLANK)													
	13	Write a formula using DATEDIF to calculate the exact number of completed years an employee has worked since their Join Date in H2 up until today (TODAY()).											
	14	Write a formula using ISBLANK to check if the Sales column is empty. If empty, return "Missing"; if not, return "Present".											
Section 5: Text Functions (LEFT, UPPER, CONCATENATE)													
	15	Write a formula to extract the first 3 characters of the employee's name in cell B2.											
	16	Write a formula to convert the department name in cell C2 into uppercase letters.											
	17	Write a formula to concatenate the employee's name and region (e.g., "Ali Khan - North").											
Section 6: Advanced Formulas (YEAR, TODAY, AVERAGEIF)													
	18	Write a formula to extract just the Year from the Join Date in cell H2.											
	19	Write a formula using YEAR and TODAY() to calculate how many years have passed since employee H2 joined the company until today.											
	20	Write an AVERAGEIF formula to calculate the average sales of employees who belong strictly to the "Sales" department.
